

Grampians Walking Tracks

Support Group

Golton Gorge

The two working bees on 1st and 2nd June were very successful. There were 12 participants on each day, including the two walking tracks Rangers on the Friday.

All the vegetation was cleared along the route and a large open area created opposite the top lookout. Shrubs and small trees had to be taken out by the roots so that no stumps would remain on the track, but the enthusiastic workforce was more than equal to the task.

The next stage is to form the track, about 600 mm wide, and this was started on the Saturday. It will be a much longer process, shifting rocks and soil with mattocks, shovels and crowbars, but it is a satisfying process where one can see solid results for one's efforts.

The NEXT WORKING BEES have been set for FRIDAY 15TH and SATURDAY 16TH JUNE, meeting at 9.00 am at Golton Gorge.

Please let me know if you intend to be there:
